PROJECTS

SkillSwap | NodeJS, ReactJS, MongoDB Atlas, Express, Tailwind CSS | [Live Link](#)

- Get mentorship or collaborate with people based on skills & interests (basically Tinder for techies).
- Developed using **ReactJS** for a beautiful frontend & **NodeJS** for a secure backend.
- Implemented **Authentication** from scratch for Sign-In.
- Users register, swipe through profile cards of other people & eventually getting a match if they match back.

OneClick - browser extension | Javascript, Tailwind CSS, HTML5 | [Live on Microsoft add-ons store](#)

- Browser extension designed using **Javascript** to streamline manual testing tasks & reduce repetitive actions.
- Uses mouse & click events to identify elements and **automate testing work**.
- A sticky draggable pop-up built from scratch which required writing functions based on mouse movements.
